Professional Experience

Full-Stack Web Developer | Freelance

2018 - Present: Buffalo, NY | Remote

↳ Utilized technologies like Bootstrap, JavaScript, Chrome DevTools and React to improve UI/UX and system flexibility of projects.

↳ Integrated solutions to freelance clients by resolving website responsiveness and UI issues.

↳ Validated sites with developer tools and media queries to ensure cross-platform compatibility and mobile responsive web designs.

↳ Leveraged knowledge and resources in full-stack for code reviews, version control, and debugging utilizing developer tools and Git.

Desktop Support & Remote Design Consultant | Top's Kitchen & Granite

June 2018 – Dec 2018: Norcross, GA | On-site & Remote

↳ Performed exceptional troubleshooting service for computer hardware, displays, peripherals, and cable networks.

↳ Customized interior room designs for contractors and clients utilizing the 20/20 Spaces design program.

↳ Utilized Active Directory to create, delete, set accounts, and change user passwords for management.

Database & Online Tools Management Intern | Hunter James Kelly Research Institute

October 2016 – April 2018: Buffalo, NY | On-site

↳ Responsible for data entry and management of over 500 antibodies from lab records into Microsoft Access database.

↳ Collaborated with management and software team to implement research database tool onto institute's website.

↳ Remodeled past database for efficiency and deployed database macros to make accessible inquiries for researchers.

Technical Projects

Portfolio Website – <https://edjunma.dev> (for additional information and projects)

GitHub – <https://github.com/edjunma> (for project source codes and open source contributions)

E-commerce Clothing Store App – <https://ejm-crwn.herokuapp.com>

↳ Full stack ecommerce application using React, Redux, and Hooks for the front-end. GraphQL, Firebase, Stripe, and Context API for the back-end and payment system. Includes features like shopping cart, checkout, add/delete items, and routes to clothing categories.

Face Recognition App - <https://smart-brain-v2.herokuapp.com>

↳ Full stack web application that detects faces from image inputs utilizing Clarifai Face Detection API. React for the front-end and Node.js and PostgreSQL/MongoDB for back-end. Some features include registering user accounts, sign-in/sign-out, and also tracking the amount of user image entries submitted into the backend.

Education

SUNY University at Buffalo / B.S. in Business Administration & Management Information Systems

Graduated with Bachelor of Science in May 2018: Buffalo, NY

CompTIA / A+ Certified in 220-901 & 220-902 since August 2018
