Professional Experience

Full-Stack Web Developer | Freelance

Dec 2018 - Ongoing: Buffalo, NY | Remote

- ↳ Design and configuration with Bootstrap, JavaScript, Chrome DevTools, and React to improve UI/UX and accessibility of projects.
- ↳ Modified existing software code to correct syntactical errors, improve readability, efficiency, and overall website performance.
- ↳ Integrated solutions to freelance clients by resolving UI issues and implementing new product features to upgrade interfaces.
- ↳ Validated sites with developer tools and media queries to ensure cross-platform compatibility and mobile responsive web designs.
- ↳ Worked closely with freelance clients to collect project requirements to ensure project quality and delivery.

IT Support & Remote Design Consultant | Top's Kitchen & Granite

June 2018 – Dec 2018: Norcross, GA | On-site & Remote

- ↳ Provided end-user support and resolved technical issues for computer hardware, displays, peripherals, and cable networks.
- ↳ Customized interior room designs for contractors and clients utilizing the 20/20 Spaces design program.
- ↳ Utilized Active Directory to create, delete, set accounts, change, test, and deployed user passwords for management.

Database Analyst & Online Tools Management (Intern) | Hunter James Kelly Research Institute

October 2016 – April 2018: Buffalo, NY | On-site

- ↳ Responsible for the analyst of data entry and management of over 500 antibodies from lab records into Microsoft Access database.
 - ↳ Collaborated with management and development team to implement research database tool onto institute's website.
 - ↳ Remodeled previous research database for efficiency and deployed database macros to make accessible inquiries for researchers.
-

Technical Projects

GitHub – <https://github.com/edjunma> (for project source codes and open source contributions)

E-commerce Clothing Store App – <https://ejm-crwn.herokuapp.com>

- ↳ Full stack ecommerce application using React, Redux, and Hooks for the front-end. GraphQL, Firebase, Stripe, and Context API for the back-end and payment system. Includes features like shopping cart, checkout, add/delete items, and routes to clothing categories.

Face Recognition App - <https://smart-brain-v2.herokuapp.com>

- ↳ Full stack web application that detects faces from image inputs utilizing Clarifai Face Detection API. React for the front-end and Node.js and PostgreSQL/MongoDB for back-end. Some features include registering user accounts, sign-in/sign-out, and also tracking the amount of user image entries submitted into the backend.
-

Education

SUNY University at Buffalo / B.S. in Business Administration & Management Information Systems

Graduated Bachelor of Science on May 2018: Buffalo, NY

CompTIA / A+ Certified in 220-901 & 220-902 since August 2018
